

Preface	iii
Cadkey Hardware Requirements	iii
To The User	iv
To The Teacher	iv
For Experienced Cadkey Users	v
About Line Weights in Example Drawings	v
Chapter 1	
The Cadkey User Interface	
Before You Start	2
The Cadkey User Interface	3
Multiple Part Drawing Windows	22
Creating a 2D Seed Drawing	23
Creating a Hex Nut Drawing	26
Chapter 2	
Creating an A-Sized Title Block	
Modifying the Seed Drawing	38
Creating a Title Block	42
Creating The Border	44
Adding the Title Strip	47
Adding Text	51
Creating a Pattern File	59
Using a Pattern File	59
Chapter 3	
Creating Basic 2D Geometry	
Creating Ferd's Toy Pickup Truck	72
Creating Circles	72
Copying Circles	76
Creating a String of Lines	77
Editing Circles	80
Adding a Title Block Pattern	81

The Cadkey Project Book

Chapter 4

Basic 2D Detail Drawing

Creating a 2D Detail Drawing	92
Using the Parallel Line Option	93
Creating and Editing Circles	97
Creating Tangent Lines	99
Modifying Entities	100
Creating Fillets	102
Using Construction Lines	104

Chapter 5

Adding Dimensions

Adding Center Lines	116
Setting Detail Attributes	120
Adding Linear Dimensions	125
Changing Arrow Direction	128
Adding Diameter and Radius Dimensions	131
Editing Dimension Text	132
Using the ADM to Create Notes	133
Changing Dimension Attributes	135

Chapter 6

Basic Solid Modeling

Creating a 3D Blank (seed) Drawing	144
Creating Solids from Primitive Shapes	147
Creating Blocks	147
Creating Fancy Corners	157
Creating a Counterbore	157
Trimming a Solid	158
Orthographic Drawings from Solid Models	158

Chapter 7

Solid Primitives

One Point Blocks	172
Sketching Blocks	175
Two Point Blocks	177
Blocks by Height and Base.	178
Creating a Torus	179
Creating Cylinders	180

Creating Cones	182
Creating Spheres	184
Creating Pyramids	186
Creating Pipes	187
Creating Compound Solids - Soft Drink Cozy	190
Chapter 8	
Creating Solids from 2D Profiles	
Creating a 2D profile	198
Extruding shapes	200
Extruding Along a Vector	206
Extruding Skewed	208
Revolving Shapes	210
Sweeping Shapes	214
Lofting	218
Helical Sweeps	220
Chapter 9	
Modifying Solids	
Boolean Operations	230
The Boolean Union	230
Boolean Operations	232
Separating Disjointed Bodies	235
Trimming Solids	237
Trimming with Solids.	244
Splitting a Body at a Plane	248
Protrusions	250
Adding a Protrusion	250
Blind Protrusion	253
Protruding with an Offset.	254
Cutting Away Material	254
Drilling Holes	257
Chapter 10	
Editing Solids	
Creating a Practice Object	266
Editing a Solid by Extruding Faces.	267
Editing a Solid by Revolving Faces.	268
Editing a Solid by Tapering Faces.	269

The Cadkey Project Book

Editing a Solid by Shadow Tapering Faces.	271
Editing a Solid by Transforming Faces.	272
Editing a Solid by Sweeping Faces.	273
Editing a Solid by Offsetting Faces.	273
Offsetting a Solid.	274
Creating a Thin Walled Shell from a Solid.	275
Removing Features From a Solid.	276
Creating Solids from Sheet Bodies.	278
Chapter 11	
Detail Drawings from Solid Models	
Creating a Flange Model	284
Creating a Detail Drawing	290
Creating a Section View.	298
Chapter 12	
Wire Frame Modeling	
Creating a Wire Frame Model	308
Creating the Angle Block	309
Setting the Drawing Depth	314
Using Construction Planes	318
Projecting Skewed	324
Using Picture It	329
Creating a Normal View of a Surface	334
Creating Solid Models from Wire Frame Models	336
Chapter 13	
Construction and Editing Tricks	
Design Changes	352
Creating a Detail Drawing	353
Creating a Normal View	354
Creating a Layout	355
Chapter 14	
An Introduction to Surface Modeling	
Creating surfaces from 2D geometry.	364
Two Curve Surfaces	364
Creating a Three Curve Surface	369
Creating a Four Curve Surface	371
Creating a Surface Using Revolution	374

Creating Surfaces Using The Tabulated Surface Option	.376
Creating Ruled Surfaces	378
Thickening a Surface to form a Solid	380
Creating a Curve Mesh Surface	382
Creating Polygons from a Surface or Solid	385
Chapter 15	
Creating Pictorial Assemblies	
Creating The BASE SAT File	392
Creating The SHAFT SAT File	396
Creating The BUSHING SAT File	397
Creating The ROLLER Model	399
Creating The Assembly	402
Creating An Exploded Assembly	407
Creating A Pictorial Sectioned Assembly	408
Copying a Rendering to a Target Application	412
Chapter 16	
Technical Illustration with CADKEY	
Creating a Practice Model	421
Hidden and Dashed Renderings	423
Viewing Wireframe Images	425
Creating Hidden Renderings	426
Using Cadkey Shade	434
Photo Realistic Rendering.	436
Exporting for Publication	440
Capturing the Display for Export	444
Creating an Enhanced Line Drawing	444
Chapter 17	
File Operations	
Part And Pattern Files.....	456
Part Files	461
Pattern Files	462
Creating And Viewing A CADL File	462
Executing CADL Files	465
Examining CADL Files	466
Creating CADL Files	468
Compiling a CADL Program	470

The Cadkey Project Book

Creating A Polygon Model	471
Converting Files To And From IGES	475
Converting Files From Earlier Versions Of Cadkey	475
SAT Files	479
Viewing SAT Files	479
STL Files	480
Virtual Reality	481

Appendix A

Cadkey Settings

Classic (menu) Mode	488
Accelerator Keymap Settings	488
Keymap Files	488
Tablet Control	490
Toolbar Default File	490
Macro Table	491
Automatically Loaded CDEs	491
Default Directory Options	492
Default Display Options	492
Default Viewport Options	492
Default Color Palette	493
Default Print/Plot Options	493
Miscellaneous Default Options	493
Creating a New Toolbar File	493
Removing a Tool from the Toolbar	494
Adding a Tool to the Toolbar	494
Saving A Toolbar File	494
Dockable Windows	494
Accelerator Keys	496

Appendix B

Hatch Patterns
