About the Author.....	viii
Preface.....	viii
Acknowledgements.....	ix
1 ARCHITECTURE AND HOW IT IS CREATED.....	1
An Important Part of Our Life	
Concepts and Definitions	
Before There Were Buildings	
The Birth and Development of Architecture	
From Concept to Reality	
2 RESIDENTIAL BUILDING CONSTRUCTION.....	13
Some Important Concepts	
Choosing and Purchasing the Land	
Documents and Contractors	
Layout and Excavation	
The Foundation	
The Superstructure	
Optional Methods	
Think Green	
3 DRAWINGS.....	45
Artistic and Technical	
Architectural Drawings	
Two Important Questions	
Decisions and Their Impact	
Tutorial Project – A Realistic Approach	
Statement of the Problem	
4 GETTING STARTED WITH DataCAD.....	59
Starting the DataCAD Program	
Naming and Creating a New Drawing File	
Displaying a Directory of All Saved Files	
Opening and Displaying a Drawing Previously Saved	
A Tour of the DataCAD Display and Interface	
Changing the Background Color of the Drawing Window	
Changing the Height of the Letters and Numbers Displayed on the Interface	
Creating a Drawing – The Basic Approach	
Setting the General Specifications for a New Drawing	
Using Drawing Layers and the “Layer Manager”	
Using the Three Coordinate Reference Lines	

5 WALLS.....	77
Visualizing the Floor Plan	
Standards for the Dimensions of Rooms and Storage Areas	
Creating the Exterior Walls	
Specifying Measurements and Dimensions	
Erasing Entities	
Using Undo and Redo	
Zooming In On a Portion of a Drawing	
Creating the Partitions	
Using the Pan Function	
Measuring Distances	
Centering an Entire Drawing in a Specific Scale	
Repairing Walls and Cleaning Wall Intersections	
6 VIEWS OF THE DESIGN MODEL.....	115
Four Basic Components	
Arrangements and Results	
Perspective Views	
Types of Perspective Views	
Creating Three-Point Perspective Views	
The Globe Symbol	
Removing Hidden Lines from a Wireframe Drawing	
Angle of Sight	
Changing the Angle of Sight for a Perspective View	
Creating Two-Point Perspective Views	
Creating One-Point Perspective Views	
Using the Globe Symbol to Create Perspective Views	
Parallel Projections	
Creating Axonometric Views	
Creating Exterior Elevation Views	
7 DOORS.....	141
Types	
Sizes	
Selecting and Locating	
Cutting Openings in the Walls	
Creating and Adding the Basic Floor Plan Symbols	
Erasing a Symbol	
Temporarily Removing a Layer Displayed on the Monitor	
Creating and Adding the Detailed Symbols	

8 WINDOWS.....	171
Comparing Windows and Doors	
Basic Types and Combinations	
Projecting an Image	
Selecting and Locating Units	
Cutting Openings in the Walls	
Creating and Adding the Basic Floor Plan Symbols	
Creating and Adding the Detailed Symbols	
Filling the Spaces Below the Windows and Above the Doors and Windows	
9 BATHROOM CABINETS AND PLUMBING FIXTURES.....	191
Guidelines for a Successful Design	
Symbols for Cabinets and Plumbing Fixtures	
Selecting and Locating the Base Cabinet	
Selecting and Locating the Cabinet Top and End Splash	
Selecting and Locating the Lavatory, Bathtub, Tub Recess, and Water Closet	
Selecting and Locating the Medicine Cabinet	
10 LAUNDRY/UTILITY ROOM CABINETS, SINK, AND APPLIANCES.....	209
Guidelines for a Successful Design	
Selecting and Locating the Base Cabinets	
Selecting and Locating the Cabinet Top and End Splash	
Selecting and Locating the Sink and Faucet	
Selecting and Locating the Soffit	
Selecting and Locating the Wall Cabinets	
Selecting and Locating the Clothes Washer and Dryer	
Creating and Locating the Furnace and Water Heater	
11 KITCHEN CABINETS, PLUMBING FIXTURES, AND APPLIANCES.....	225
Guidelines for a Successful Design	
Selecting and Locating the Base Cabinets	
Selecting and Locating the Dishwasher, Range, and Refrigerator	
Selecting and Locating the Cabinet Tops	
Selecting and Locating the Sink and Faucet	
Selecting and Locating the Soffits	
Selecting and Locating the Wall Cabinets	

12 FLOOR, CEILING, FOUNDATION, WOODSTOVE, GROUND SURFACE, STAIRS, DRIVEWAY, WALKS, VEHICLES, ROOF, AND INTERIOR FURNISHINGS.....	255
Creating the Floor	
Creating the Ceiling	
Creating the Foundation	
Creating a Woodstove, Chimney, and Chimney Enclosure	
Creating the Ground Surface	
Creating Stairs for the Exterior Entrances	
Creating the Driveway	
Creating Two Walks	
Adding Vehicles to the Driveway	
Creating the Roof	
Adding Interior Furnishings	
13 PICTORIAL ILLUSTRATIONS.....	285
Enhancing the Model	
The Fundamentals of Using o2c	
Selecting a Palette of Colors	
Creating the Finish Floors	
Changing the Wireframe Colors of the Model	
Identifying the Attributes of an Entity	
Changing an Attribute of an Entity	
Assigning a Rendering Color, Texture, and Material Properties to the Entities	
Rendering and Viewing the Model	
Adjusting the Material Properties of the Entities	
Changing the Background Color of the Display	
Saving an o2c Rendering	
The Fundamentals of Using o2c Interactive!	
Exporting an o2c Rendering to o2c Interactive!	
A Tour of the o2c Interactive! Display and Interface	
Creating, Saving, Selecting, Displaying, and Deleting Views	
Creating, Saving, Selecting, Displaying, and Deleting a Scheme	
Adding a Name to a Numbered Material	
Combining Views and Schemes	

14 FLOOR PLAN DESIGN PRESENTATION.....323

- Options and Variations
- Modifying the Basic Door Symbols
- Using Dashed Lines to Represent Some Objects
- Adding Text
- Justifying Lines of Text
- Adding the Floor Tile Hatch Pattern
- Trimming the Floor Tile Hatch Pattern
- Filling the Walls with a Hatch Pattern
- Creating the Design Presentation Floor Plan
- Saving a View on a New Layer
- Erasing or Deleting a Layer
- Printing the Design Presentation Floor Plan
- Printing a Line Drawing

15 EXTERIOR AND MULTIVIEW DESIGN PRESENTATIONS.....353

- Options and Variations
- Creating a Presentation Drawing of an Exterior Elevation
- Creating a Presentation Drawing of a Perspective View
- Creating a Presentation Drawing of a Plot Plan
- Creating a Presentation Drawing of a Landscape Plan
- Creating a Multiview Presentation
