

SURFCAM Velocity - Powered by Truemill.

SURFCAM CAD/CAM systems allow you to machine with experience and provide cutting edge technology for NC programming of 2-, 3-, 4- and 5-axis mills, lathes, wire EDM, laser plasma and water-jet machines. This full featured, powerful yet easy-to-use software is a perfect fit for any schools CAM requirements.

What is TrueMill?

TrueMill is Surfware's new patent pending toolpath engine that provides dramatic reductions in cycle time by dynamically managing tool loads. Using the superior motion control of CNC machine tools, TrueMill precisely controls the tool's engagement with the material to facilitate deep depths-of-cut and large stepovers. Only available in SURFCAM Velocity, TrueMill technology redefines high speed machining.

- **2,3,4 & 5 Axis computer aided machining software at a price that educators can afford.**
- **Tool Libraries with tool sorting methods.**
- **Function specific tool paths.**
- **UG NX2 native Support and MUCH more.**

Single Classroom license

A full version single copy for the classroom or for Faculty use.

System Requirements

SURFCAM Velocity - *Min. Requirements:* PIII/800, Win 2000 SP4, 128MB RAM, 800MB HD Free, 32MB VRAM (1024x768 screen res.), DirectX 9.0 (included) *Recommended Configuration:* P4 3.4 or Equivalent, Win XP Pro SP1a, 1GB Ram, 1GB HD Free, 256MB VRAM, (1280x1024), DirectX 9.0 (included)

Academic Lab Packs

Each Lab pack includes:

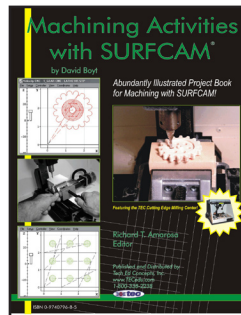

- **FULL commercial versions of SurfCAM**
- **Faculty and Student Manual and Activity book**

5 Users	\$2,695
10 Users	3,695
25 Users	5,995
Additional Lab Pack Seats	\$399

SurfCAM Maintenance

First Year of Maintenance FREE.

2nd Year: One Seat \$400, Each Additional seat \$200 to a Maximum of 5 Seats. All additional seats are FREE.

Machining Activities with SURFCAM

Written By: David Boyt

This project book is packed with SURFCAM machining Activities. From the first design to producing a finished part, this book will lead you through a series of projects that build on one another.
